

# Stanislav Myakishev

## CORE SKILLS

JavaScript, TypeScript, React, HTML/CSS, GraphQL, cypress, webpack

## WORK EXPERIENCE

### Sberbank

JULY 2020 – PRESENT

#### Software engineer (dev team – 13 people)

Development of React/TypeScript/GraphQL release orchestration tool for DevOps pipelines centralization. Application is used by 35% of bank apps (2700+ applications and services).

Achievements:

- Reduced main pipeline entity save method size by 40% by implementing GraphQL mutation over REST API scheme, leading to 30% faster save time.
- Designed and launched cypress e2e tests in the project, built core test cases covering the main functionality which reduced the time of manual testing by 50-60%.
- Decreased routing related bugs by 30% by migrating the project from react-router 3.0 -> 5.0: the entire routing of the application was redesigned and transferred to TS, new utilities for development were added, and the global wrappers of the application were refactored.

### Emphasoft

#### Junior full-stack developer

OCTOBER 2019 – JULY 2020

Development and refinement of React applications for small / medium businesses. Worked on projects: AI interface of the electronic shopping cart platform ([shopic.co](https://shopic.co)), real estate agency website ([parkplacemi.com](https://parkplacemi.com)), internal chat project.

Achievements:

- Built the interface of the redesigned products cart page, which introduced new features and increased the interface interaction speed by 20%.
- Implemented a multi page redux form for creating a property sale page (used by 100+ companies on launch).
- Engineered the core of corporate chat (React, Redux, Material UI), which allows users to be a member of several departments and integrated with 5 corporate chat bots.

## ABOUT ME

Run team agile retrospective: reworked meeting format so the innovations received a positive assessment from colleagues; made it possible to produce more specific action-items, and added control over their implementation. Supervise diving into the project for new front-end engineers. Take part in meetups, and was a speaker at an internal front-end meetup (100+ people) with the topic “How a storybook makes your life easier” about storybook integration with the product design system.

## EDUCATION

### ITMO, Saint Petersburg

SEPTEMBER 2017 – JUNE 2021

### XAMK, Mikkeli, Finland

JANUARY 2019 – MAY 2019

BCs – Information Systems and Technologies

## COURSES

**CCNA Routing and Switching:**  
*Scaling Networks*

**CCNA Routing and Switching:**  
*Connecting Networks*

**Financing and Business planning**  
(XAMK University)

## LANGUAGES

English – C1 (Advanced)

Russian – Native
