PROGRAMMING SKILLS

JavaScript, TypeScript, React, jQuery, effector, GraphQL, cypress, vitest, react-router, Sass, styled-components

SUMMARY

Throughout my 4-year-plus career as a software engineer, I have focused on developing products that provide the most value to businesses and help achieving their goals. I enjoy collaborative work but also able to run projects independently. My passion is a continuous learning, knowledge management and sharing which helps me to hire, onboard and edify colleagues.

EXPERIENCE

- **Go Travel Un Limited** *(Tickets metasearch with 20M monthly active users)* — Hong Kong
  Software engineer — *Mar. 2022 - present*

  Leading the development of the CMS/CRM travel content system frontend client, meeting the reqirements of editors and scouts, and ensuring its suitability for external use. Hired, onboarded and mentored frontend developers for the project needs.

  - Designed, developed and migrated the CMS to the new React/TypeScript/Effector client, which increased the speed of content delivery by 20% and reduced the development costs for new parts of the product.
  - Enhanced editor productivity by 40-50% and increased the stability of the legacy CMS client by implementing the webpack bundling, integrating reliable CSRF checks, and thoroughly covering core functionality with unit tests.
  - Automated the procedure of sending and signing offers with content authors through the creation of a dedicated CRM application built with Node/React, which reduced the signing process time by 90%.

- **Sberbank** *(60th largest bank in the world)* — Saint Petersburg, Russia
  Senior Frontend Developer — *Jul. 2020 - Feb.2022*

  React/TypeScript/GraphQL client of release orchestration tool for DevOps pipelines centralization. Application is used by 35% of bank apps (2700+ applications and services). Started as a junior developer and got three promotions after. In the last few months of work took the role of the product manager.

  - Reduced the weight of the pipeline save request by 40% via developing a GraphQL mutation approach instead of a REST API, which reduced the running time of the main scenario by 30%.
  - Designed and implemented e2e tests in the project from scratch, developed test cases covering the main functionality. This initiative led to a reduction in manual testing time, by 50-60%.
  - Achieved a 30% reduction in routing bugs by upgrading the project from react-router 3.0 to 5.0. This involved a comprehensive renovation and transfer of routing scheme to the TypeScript, accompanied by new dev utilities.

- **Emphasoft** — Saint Petersburg, Russia
  Frontend developer — *Oct. 2019 – Jul. 2020*

  Developed and refined the React applications for small/medium-sized businesses. Worked on AI interface of the electronic shopping cart platform (shopic.co and a real estate agency website (parkplacemi.com) .

  - Built the interface of the redesigned products cart page, which introduced new features and increased the interface interaction speed by 20%.
  - Implemented a main form for creating a property sale page (used by 100+ companies on launch)
  - Engineered the core of corporate chat (React/Redux/Material UI). Developed corporate chat bots, making possible the company's full migration of communication to the internal platform.

EDUCATION

- **ITMO University** — BSc, Computer Science
  QS World University Rankings: Top 100 in CS; GPA: 4.8/5.0 — *Sep. 2017 – Jun. 2021*

- **South-Eastern Finland University of Applied Sciences** — Exchange study
  GPA: 4.7/5.0 — *Jan. 2019 – May. 2019*

- **CCNA Routing and Switching** *(Cisco learning lab)*
- **Microsoft Security Fundamentals course** *(University based)*
